

**Your claims,  
your way.**

# Better outcomes for less investment.

Insurance businesses are often presented with a choice - to deploy disparate, disconnected technologies to fix individual problems and gaps, or to incur huge expenditure over several years to implement a new, rigid architecture. Either way, risk remains – to customer experience, employee experience, and business finances.

**Claim Suite** minimises these risks with a modular and connectable suite that can easily be tailored to the way you run your business – providing better outcomes for less investment.

Enabled to fit into your architecture and requirements, **Claim Suite** saves you time and money, making claims as connected, fair and efficient as possible, when everyone is at their most vulnerable.

## Connected.

Connect to a marketplace of best-in-class suppliers, technologies and solutions that get your customers back to normal faster.

## Modular.

Minimise the risks of disparate and disconnected technologies with our modular and connectable cloud-based platforms and solutions.

## Flexible.

Agile solutions allow fast and easy integration to your core platforms, with bespoke commercial models for any business type.

# The right solutions at the right time.

**Claim Suite** provides you with connectable and configurable solutions that help you plan, capture, administrate and manage your insurance claims to get your customers back to normal faster.
